BrightSmile Dental Group - Request for Proposal: Patient Booking A

Issued by: Megan Walsh, COO, BrightSmile Dental Group (Ohio and Michigan, USA)

Background and needs

Hi Empower team,

We run 14 dental clinics across Ohio and Michigan (BrightSmile Dental Group). Right now patients call the front desk to book, and our staff spend most of the morning on the phone. We want:

1. A patient app (iPhone + Android) and a matching website where patients can book, reschedule and cancel cleanings and appointments with a specific dentist or hygienist.

2. SMS and email reminders 48h and 2h before the visit, with a 'confirm' button. No-shows cost us a lot.

3. Patients should see their upcoming visits, past visit summaries and outstanding balance, and pay the balance by card.

4. A simple admin panel for front-desk staff to manage dentist schedules, block holidays and see the day's bookings per clinic.

5. Our practice management system is Dentrix; bookings need to sync with it (they have an API, we think).

We obviously need this to be HIPAA compliant. We'd like to go live before our busy season in early April. Budget is not fixed but our board was thinking around $60-80k. Can you send a proposal with timeline and price?

Thanks,

Megan Walsh

COO, BrightSmile Dental Group

Evaluation

Proposals will be compared on understanding of our needs, HIPAA approach, timeline, team and price. Please include assumptions and questions for us.
